med, large)

FITTING YOUR HEADSET

To size the headset for a tighter fit, attach the CM-HSi headband to the interior of the headframe and snap to frame on both sides.

SECURING YOUR BOOM MIC

When adjusting your boom microphone, always secure the mic to the headset by aligning the arrow with the circle to "lock" the mic into position. **DO NOT** force the boom past this point as it may cause damage to your microphone over time.

SWITCHING INTERCOM SYSTEMS

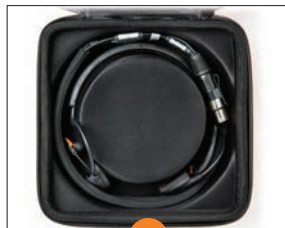

Your headset can be conveniently adapted to work with different intercom systems or even your smart phone. Visit our accessories page online for cross compatibility options.

STORING YOUR HEADSET

Gently place the headset into the base of the case.

Coil the cable around your headset until you reach the end of the cable.
