IS YOUR MICROPHONE WATERPROOF?

Look for the W (IP 57 waterproof) in the model number on the white tag near the end of the mic cable.

"W" Indicates Waterproof

Sound waves cannot pass through water so you must clear whatever is blocking the mic aperture by gently shaking out the water and allowing the microphone to air dry. Scan the barcode for more cleaning and care tips.

Water & Windscreens

Windscreens are highly recommended in heavy water usage where it is expected that water will very likely flood the aperture.

PROPRIETARY HARDWIRED CONNECTORS

Patented ENDURE™ connectors are designed for use as is. Please do **NOT** apply additional strain relief as this may cause damage.

CABLE CARE

Use care when storing your microphone; coil the cable so that it rests flat.

Do **NOT** wrap the cable around the body pack or coil the cable in any way that creates serious bends or strain on the cable.
